Jay A. Burnette – Fairbanks Morse Engine

Jay Burnette is the Director of Sales and Marketing for Fairbanks Morse Engine, an operating division of EnPro Industries. Fairbanks Morse manufactures a broad range of reciprocating engines for power generation, marine propulsion, and other heavy industrial applications. Fairbanks Morse also packages and markets low emission gas turbine technology for distributed energy markets under a license agreement with OPRA Optimal Radial Turbine B.V. in the Netherlands. Mr. Burnette has held a variety of marketing and sales positions since joining Fairbanks Morse in 1991, including serving as regional sales manager in Houston, Texas. He currently leads the RTG20 Turbine Systems group as well as the sales and marketing efforts for the Fairbanks Morse aftermarket business.

Prior to joining Fairbanks Morse, he was an OEM Account Manager in the automotive segment of Cummins, Inc. located in Columbus, Indiana. He holds a Bachelor of Science degree in Mechanical Engineering from Purdue University. Mr. Burnette has been involved with several initiatives focusing on the advancement of distributed generation technologies and markets. Most recently he has served as a member of the Public Service Committee advisory committee that developed rules to create a statewide distributed generation interconnect standard for the State of Wisconsin.
